

Benefits of aucos control systems:

- **High capacity and secured quality based on the aucos Mixed Cycle Program**
- **Flexibility and predictable capacity**
- **Lead Computer driven control system**
- **Supporting absolute Transporter positioning by laser or other devices run up to 250 m/min.**
- **High line availability using smart service and maintenance systems**
- **Experience based on 2000 automated lines worldwide up to 30 Transporters and 10 Shuttles**
- **Supporting all kinds of technology like PoP, Zinc, Nickel, Anodizing, Chrome, Gold, Silver, Cleaning, Powder Coating etc.**
- **Tool for predictable quality and production**
 - **Traceability of flight bars**
 - **Complete reporting and analysis of line production**
 - **Fault acknowledge management**
- **Simulation of process run for line layout investigations and short start up**
- **Process control using dosing systems and analyzing tools**
- **Programmable rectifier settings based on parts**
- **International availability by offices in Germany, USA, India and China**
- **24\7 Services**
