

# SPP 4

DOSING PUMP

## Highlights

Compact pump ideal for small flowrates and low speed continuous dosage or intermittent dosage. Its transparent rotating lid and rotor with easy grip makes it easy to replace the pipes safely and without needing any tools. A wide range of pipe diameters also enables to cover a wide range of flowrates.

## SPP KIT

The SPP kit converts a 230V alternating current to 24V DC. The power supply enables a direct connection on any kind of outlet or directly on a machine. It can be equipped with a circuit board enabling the automation of the pump.

## Technical features

<b>Power supply</b>	24 Vdc* or 230 Vac**					
<b>Frequency</b> - Hz	50					
<b>Max pressure</b> - bar	2					
<b>Tube materials</b>	Tecknoprene®, Silicone®, Viton® polypropylene connectors					
<b>Weight without accessories</b> - kg	0,4 kg					
<b>Power</b> - Watts	5 up to 12					
<b>Rotation speed</b> - rpm	<b>10</b>	<b>20</b>	<b>30</b>	<b>40</b>	<b>60</b>	
<b>Max flowrate</b> - l/h	Ø tube 1,6 - mm	0.08	0.17	0.25	0.34	0.5
	Ø tube 3,2 - mm	0.36	0.72	1.08	1.44	2,16
	Ø tube 4 - mm	0.60	1.20	1.80	2.40	3,6

\*24 Vdc : 20, 60 RPM

\*\*230 V: 10, 20, 30, 40, 60 RPM

Others on request.
